BUILD NEW TELECOMMUNICATIONS FACTORY, EQUIPMENT

FACTORY TO BE COMPLETED IN 1952 -- Zagreb, Borba, 15 Jul 51

Trebinje, 14 July -- A telecommunications equipment factory is being built near Trebinje and will be completed in 1952. It will manufacture telegraph and telephone equipment.

In 1951, construction will be completed on the factory's tool-making shop, which will build a prototype of telecommunications equipment for serial production. Later, the design office, a transformer station, and four apartment houses will be built.

The "Hercegovina" Construction Enterprise, which is building the factory, lacks over 100 unskilled laborers, for which reason two shifts cannot be worked although there is no shortage of skilled workers.

In Croatia and Slovenia 80 students are being taught to work in the new factory, and a separate industrial school will be opened in 1951 to train personnel for this factory.

TELECOMMUNICATIONS PLANT FULFILLS PLAN -- Sarajevo, Oslobodjenje, 25 Jun 51

Sarajevo, 24 June -- The Telecommunications and Safety-signal Equipment Factory in Sarajevo fulfilled its semiannual plan on 22 June, although it has a shortage of skilled workers. During the first half of 1951 the factory produced some new products which were previously imported, such as parts for telephone centrals. The quality of production improved 6 percent over 1950, as a result of inspection of finished products.

The production plan for 1951 is 60 percent greater than 1950.

INSTALL LARGE TELEPHONE CENTRAL -- Ljubljana, Slovenski Porocevalec, 6 Jun 51

The largest telephone central in Yugoslavia is to be installed in the new post office planned for Ljubljana. The new telephone central will have 4,000 connections.

ADD NEW RADIO STATION -- Zagreb, Narodni List, 6 Jun 51

The Slavonski Brod Radio Station, fifth largest in Croatia, began operating on a medium wave length of 212.4 meters, the same wave length used by the Novi Sad and Maribor stations.

At present, the Slavonski Brod Radio Station will broadcast 4 hours daily and will rebroadcast a 2½ hour program from Radio Zagreb. In July, the schedule will be increased to 6 hours daily. The station has a range of 100 kilometers and strength of 0.07 kilowatt.
